The winners of the crossover games advance to the Gold Medal game. The losers of the crossover games play the Bronze medal game.

- a) Two teams tied, the winner of game, or games between the two teams advances.
- b) If the two teams are still tied, the Goal Differential Formula will be used to break the tie. All goals scored during the competition shall be used in the goal differential computation.
- c) If a tie still exists, the team with the least penalties in minutes in all Round Robin games played shall be declared the winner. In the case where the teams have not played the same number of games, the lowest average of the penalties in minutes in all Round Robin games shall be used to declare the winner.
- d) If a tie still exists then a coin toss will decide the winner.
- e) Three or more teams tied, the team(s) that won the greater number of points in games, during the competition, between the team(s) tied shall be declared the winner of the higher position (Head to Head to Head)

- g) If a tie still exists, the Goal Differential Formula will be used to break the tie. All goals scored in all games during the competition shall be used in the goal average computation.

$$\frac{\text{Goals For} - \text{Goals Against}}{\text{Total Goals}}$$

In the formula, the scores of all the games in the Round Robin of the tied teams are used. The maximum difference in scores allowed per team will be 12, which is achieved by reducing “Goals for”. Actual scores are used except those matches where the goal difference exceeds 12. In these cases, the goal difference is reduced to 12.
